GENERAL ELECTRIC PUT LOWERED PRICES AHEAD OF OTHER THINGS

General Electric lowered prices because we wanted to do our part to stop the present spiral of inflation. General Electric lowered prices on electrical appliances in greatest demand-because that is where lowered prices on General Electric products will do the most good and have the greatest effect. General Electric lowered prices regardless of the fact

that G-E profits are not high—are not at present levels high enough. We did this because we know that in the long run General Electric can prosper only as the people of this country prosper. We believe that producing more goods for more people at less cost is the soundest way of running a business. And we feel that inflation in this country has reached a dangerous level-for the wage earner, for the man with savings, and for industry alike.

Do you know what inflation can do to you?

As money buys less and less, your savings lose their buying power. Life insurance policies dwindle in value. Money saved to take your wife to the hospital won't pay the bill when the time comes. Pay checks buy less and less. Retirement money won't pay for retirement.

This applies to the man who brings home a weekly pay check, to the man with a little savings in the bank or a life insurance policy, and to companies that have to build new plants and buy new machines to fill future needs and provide future jobs.

Inflation is a sinister thing. It steals up on a country and its economy in a gradually accelerating two-step of prices and wages-each trying to get one step ahead of the other-and there is no red line to show when the danger point has been reached. Inflation is like a fire. Once it gets well under way, it can never be checked until everything is destroyed.

Self-restraint by industries and individuals the best check You as an individual can do most by buying less and

saving more-thus avoiding bidding up the prices for scarce goods. Business and industry can do much by lowering prices whenever and wherever possible-General Electric put lowered prices ahead of other

things because we believe it is a step towards licking

3 Unions Block Labor Peace—Refuse Wage Boost Already Accepted by 19 Other Railroad Unions!

neers, Brotherhood of Locomotive Firemen and Enginemen and the Switchmen's Union of North America, representing 125,000 railroad employes, have refused to accept the offer of the Railroads of a wage increase of 15½ cents an hour. his is the same increase awarded 1,000,000 non-operating employes by an arbitration board in September, 1947. his is the same increase accepted by 175,000 conductors, trainmen and switch men by agreement on November 14, 194 nents have been made with 75,000 employes, represented by nineteen unions. But these three unions, representing only 125,000 men, are trying to get more. They are demanding also many new working rules not embraced in the settlement with the conductors and train Incidentally, the Switchmen's Union of North America represents only about 7 of all railroad switchmen, the other 939 being represented by the Brotherhood Railroad Trainmen and covered by the settlement with that union.

Strike Threat The leaders of these three unions spread a strike ballot while negotiations were still in progress. This is not a secret vote but is taken by union leaders and votes are signed by the employes in the presence When direct negotiations failed, the leaders of these three unions refused to join the railroads in asking the National Mediation Board to attempt to settle the pute, but the Board took jurisdiction at the request of the carriers and has been earnestly attempting since November 24, 1947, to bring about a settlement. The Board on January 15, 1948, announced its inability to reach a mediation settlement. The leaders of the unions rejected the request of the Mediation Board to arbitrate The release accepted.

The Unions having refused to arbitrate, the Railway Labor Act provides for the appointment of a fact-finding board by The railroads feel it is due shippers general public to know that through t these negotiations and in mediation they have not only exerted every effort to reach a fair and reasonable settlement, but they have also met every requirement of the Railway Labor Act respecting the It seems unthinkable that these three unions, representing less than 10 per cent of railroad

for 1,175,000, nor will it alter the opposition of the railroads to unwarranted wage creases or to changes in working rules which A glance at the box shows what employe represented by the Engineers and Firemen make. They are among the highest paid in the ranks of labor in the United States, if not
